George J. Gould states that no definite plans have been made for a connecting line between the Wabash and Western Maryland.

that month is 78 degrees, against a mean of 76 degrees in March, while at Havana the average heat of March and April are respectively about 74 and 76 degrees. As the rainy season seldom sets in before the last of April such heat is not oppressive.

That's why. Alton B. Parker says "the republicans are rotten to the core." Democracy isn't! no core.

## "Deadheads."

About the meanest bill now in the Legislature is that paradox, the Anti-Pass bill, introduced by Senator Brackett, with the rider tacked on to it, yesterday by a vote of 23 to 19.

It starts out virtuously with a blow at the vicious pass system, and viciously falls from grace, and in the rider of yesterday requires railroads to carry all members of the Legislature and all State officials as "deadheads."

What could be meaner and more contemptible for a great State body to utter than this? What is now the preamble to the bill recognizes the wrongdoing by legislators in accepting small favors in the way of passes from railroads in connection with which companies legislation is engineered, and what is now the real body of the bill enables the legislators and State officials to ride free where all others pay their way.

To write themselves down "dead heads" in this manner is contemptible.

Why should the railroads carry them without cost? Are they not paid for their services by the people? If they are free to travel without putting their hands in their pockets, why not carry the economical idea further and compel tailors to clothe them, the butcher and baker and candlestick maker to fill their larders with provisions and provide them with household goods in general? And why not have the theatres allow them to join the great procession of "dead heads" besieging the box office, and see the "show" free?

Why stop at railroad deadheadism with so much else within comfortable reach? By all means add the whole list by an early vote of 23 to 19, since the self-respect and common decency of the State Senate are not to be considered!

Russia, it is announced, has fewer doctors than any other country in the world. Know that somebody would say something good about that empire some day.

**The Insurance Scandals.**  
That the country is shocked, horrified, and cries out for escape and protection from all this vice and double dealing shows that American honesty was not dead but sleeping—Albany (N. Y.) Citizen.

Yes, but the alarm clock rang loud and long before it waked that heavy sleeper. However, now that he is roused there is reform in the air.

Untaxed Alcohol for Industrial Uses.  
The Standard Oil and other owners of petroleum lands are properly permitted to produce free from taxation various materials used in the arts and for heating, lighting and fuel.

Why should not the American farmer's corn be treated on equal terms for conversion into alcohol for use in manufactures and in heating and lighting and as fuel for internal combustion engines in competition with petroleum products?

Along among civilized nations the United States in taxing alcohol as a beverage makes no provision for its untaxed use in the industries. Hence the production of a material which could be sold at perhaps fifteen cents a gallon is prohibited by a tax of more than two dollars a gallon.

In all the countries of Europe alcohol for industrial and mechanical purposes is differentiated from that used in beverages by denaturizing it—by infusing some substance unpleasant to the taste and poisonous. There is a provision for this in the bill for untaxed alcohol for industrial and mechanical use to be reported to the Ways and Means Committee at its meeting to-day.

As alcohol can be made everywhere and from any sort of agricultural produce its possible production is unlimited, and the country should have the manifold benefits of its untaxed use on the farms and in the arts and industries.

Burglar "help-up" by a Brooklyn girl not only restored the lost key but had taken but left sixty cents of his own behind him. Lucky to get away with his life!

**Mispronunciation.**  
"Also an Amused Reader," in a communication published in to-day's column of letters from Herald readers, is quite right when he says, referring to "Much Amused Reader's" remarks, that though Americans laugh at the mispronunciation of words by Englishmen the former need not go abroad to hear our common language ill treated.

Mispronunciation of even the commonest words is so frequently heard here and in Great Britain that it is the pot calling the kettle black for either country to take the other to task along these lines. If we have a real national sin, however, it is in the use of slang, in which Americans are becoming unpleasantly pre-eminent.

Why not turn over a new leaf and use and pronounce English correctly?

Former Governor Odell says MEMORIES, he delights in beautiful memories. If it were not for that adjective one might assume that he often thinks of himself.

**News.**  
The newspapers of the past week have chronicled no startling sensations—Lexington (Ky.) Herald.

Has not our esteemed contemporary read the Herald?

Senator Grady in speaking for the free pass "grate" lugged Waxel at the reform spirit of the age by saying: "We are too good to ought to live in the clouds." Too far away; must see and keep both eyes on the Senator all the time.

A moss grown business like a moss grown stone tells of stagnation. THE HERALD has brought the polish of success to every sort of worthy enterprise.

**PERSONAL INTELLIGENCE.**  
Herald Weather Forecasts.  
[Based on meteorological reports gathered by the Herald.]  
Slowly clearing conditions now prevail in the middle and north Atlantic States, and

the weather will be fair in these sections to-day and to-morrow. The disturbance off the north Atlantic coast will move eastwardly without developing much strength. The weather will be generally fair in the Ohio Valley, the lake region and the Northwest, but unsettled in the Southwest. Temperatures will fall slightly over the eastern side of the country. Moderate westerly to northwesterly breezes are indicated off the coasts from the Capes of the Delaware to Boston.

IN NEW YORK AND NEIGHBORING REGIONS TO-DAY FAIR WITH BREEZE AND SLOWLY FALLING TEMPERATURE WILL PREVAIL.
